

The Boiler Inspection & Insurance Company of Canada

BI&I is on the move...

We are taking a giant leap to our new Head Office at 250 Yonge Street. BI&I will be in our new location on Monday May 28th, 2007. We will miss our location at 18 King Street East, that we've resided in for the past 10 years, but there are several advantages to this new location.

Our Head Office, consisting of our Executive offices, HO Underwriting, Claims, Engineering, Inspection, IT and Reinsurance Assumed departments will be conveniently located on the 30th floor. Moving along with us will be our Toronto Branch which will be located one floor above on the 31st floor. In addition to our spectacular view, BI&I's new office tower forms part of the Eaton Center, one of Toronto's finest shopping centers. We are all very excited about our new location.

Today, BI&I continues to move forward, being Canada's leading provider of engineering-based insurance products and related technical services.
